Diversity in Families Maxine Baca Zinn, D. Stanley Eitzen, Barbara Wells, 2013-10-03 This award-winning text treats family diversity as the norm, while highlighting how race, class, gender, and sexuality produce varieties of familial relationships. *Diversity in Families* looks at families not as “building blocks of societies” but rather, as products of social forces within society. The authors undertake a critical examination of society, asking questions such as, “How do families really work?” and “Who benefits under the existing arrangements, and who does not?” Their goal is to demystify and demythologize the family by exposing existing myths, stereotypes, and dogmas.

Golden Gulag Ruth Wilson Gilmore, 2007-01-08 Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called the biggest prison building project in the history of the world. *Golden Gulag* provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in

punitive justice such as the three strikes law—pose profound and troubling questions for the future of California, the United States, and the world. Golden Gulag provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

Messner, 2000 This engaging collection of readings presents a multifaceted view of contemporary gender relations. In addition to articles about men, women, and sexual, and immigrant diversity, this reader also includes works on gender and globalization. The editors introduce this wide-ranging collection with a provocative analytical introduction that sets the stage for understanding gender as a socially constructed experience. Presents a discussion of women's and men's issues. Includes articles on international and transnational factors in addition to the articles on U.S. gender relations. The Dating Divide Celeste Vaughan Curington, Jennifer Hickey Lundquist, Ken-Hou Lin, 2021-02-09 The data behind a distinct form of racism in online dating The Dating Divide is the first comprehensive look at digital-sexual racism, a distinct form of racism that is mediated and amplified through the impersonal and anonymous context of online dating. Drawing on large-scale behavioral data from a mainstream dating website, extensive archival research, and more than seventy-five in-depth interviews with daters of diverse racial backgrounds and sexual identities, Curington, Lundquist, and Lin illustrate how the seemingly open space of the internet interacts with the loss of social inhibition in cyberspace contexts, fostering openly expressed forms of sexual racism that are rarely exposed in face-to-face encounters. The Dating Divide is a fascinating look at how a contemporary conflux of individualization, consumerism, and the proliferation of digital technologies has given rise to a unique form of gendered racism in the era of swiping right—or left. The internet is often heralded as an equalizer, a

seemingly level playing field, but the digital world also acts as an extension of and platform for the insidious prejudices and divisive impulses that affect social politics in the real world. Shedding light on how every click, swipe, or message can be linked to the history of racism and courtship in the United States, this compelling study uses data to show the racial biases at play in digital dating spaces.

Live and Die Like a Man Farha Ghannam, 2013-09-04 An anthropologist deconstructs the notion of masculinity using twenty years of field research in the Cairo neighborhood of al-Zawiya. Watching the revolution of January 2011, the world saw Egyptians, men and women, come together to fight for freedom and social justice. These events gave renewed urgency to the fraught topic of gender in the Middle East. The role of women in public life, the meaning of manhood, and the future of gender inequalities are hotly debated by religious figures, government officials, activists, scholars, and ordinary citizens throughout Egypt. *Live and Die Like a Man* presents a unique twist on traditional understandings of gender and gender roles, shifting the attention to men and exploring how they are collectively “produced” as gendered subjects. It traces how masculinity is continuously maintained and reaffirmed by both men and women under changing socio-economic and political conditions. Over a period of nearly twenty years, Farha Ghannam lived and conducted research in al-Zawiya, a low-income neighborhood not far from Tahrir Square in northern Cairo. Detailing her daily encounters and ongoing interviews, she develops life stories that reveal the everyday practices and struggles of the neighborhood over the years. We meet Hiba and her husband as they celebrate the birth of their first son and begin to teach him how to become a man; Samer, a forty-year-old man trying to find a suitable wife; Abu Hosni, who struggled with different illnesses; and other local men and women who share their reactions to the uprising and the changing situation in Egypt. Against this backdrop of individual experiences, Ghannam develops the concept of masculine trajectories to account for the various paths men can take to embody social norms. In showing how men work to realize a “male ideal,” she counters the prevalent dehumanizing stereotypes of Middle Eastern men all too frequently reproduced in media reports, and opens new spaces for rethinking patriarchal structures and their constraining effects on both men and women. Praise for *Live and Die Like a Man* “In a book that lives up to its name, anthropologist Ghannam explores what it means to be a man Her thick descriptions, amassed over 20 years of research, will make readers laugh, cry, and gasp at the lives of these individuals By examining the construct of manhood, Ghannam is charting new territory in Middle Eastern studies. Summing Up: Highly recommended.” —CHOICE “With its focus on masculinity, Farha Ghannam’s thoughtful ethnography, *Live and Die Like a Man*, makes important interventions into the anthropological scholarship on gender, childhood, and family in the Middle East Her ethnographic sensibility perfectly grasps the dynamic and complex intertwining of male and female ways of being and self-presentation and how that interrelationship forms men’s lives.” —International Journal of Middle East Studies

Our Enemies in Blue Kristian Williams, 2015-08-03 Let's begin with the basics: violence is an inherent part of policing.

The police represent the most direct means by which the state imposes its will on the citizenry. They are armed, trained, and authorized to use force. Like the possibility of arrest, the threat of violence is implicit in every police encounter. Violence, as well as the law, is what they represent. Using media reports alone, the Cato Institute's last annual study listed nearly seven thousand victims of police misconduct in the United States. But such stories of police brutality only scratch the surface of a national epidemic. Every year, tens of thousands are framed, blackmailed, beaten, sexually assaulted, or killed by cops. Hundreds of millions of dollars are spent on civil judgments and settlements annually. Individual lives, families, and communities are destroyed. In this extensively revised and updated edition of his seminal study of policing in the United States, Kristian Williams shows that police brutality isn't an anomaly, but is built into the very meaning of law enforcement in the United States. From antebellum slave patrols to today's unarmed youth being gunned down in the streets, peace keepers have always used force to shape behavior, repress dissent, and defend the powerful. *Our Enemies in Blue* is a well-researched page-turner that both makes historical sense of this legalized social pathology and maps out possible alternatives.

Getting Real About Race Stephanie M. McClure, Cherise A. Harris, 2017-08-24 *Getting Real About Race* is an edited collection of short essays that address the most common stereotypes and misconceptions about race held by students, and by many in the United States, in general.

In Conflict and Order D. Stanley Eitzen, Maxine Baca Zinn, Kelly Eitzen Smith, 2013 This introductory text, written from a conflict perspective, emphasizes four themes: diversity, the struggle by the powerless to achieve social justice, the changing economy, and globalization.

In the Flesh V. Pitts, 2003-05-15 Through an interview-based study, Victoria Pitts has researched the subcultural milieu of contemporary body modification, focusing on the ways sexuality, gender and ethnicity are being reconfigured through new body technologies - not only tattooing, but piercing, cyberpunk and such 'neotribal' practices as scarification. She interprets the stories of sixteen body modifiers (as well as some subcultural magazines and films) using the tools of feminist and queer theory. Pitts not only covers a hot topic but also situates it in a theoretical context.

The American Perception of Class Reeve Vanneman, Lynn Weber Cannon, 1988-07 Scholars and nonacademics alike have usually assumed that the American working class does not think of itself as a coherent class opposed to the dominant powers in American society-in short, that it is not class conscious. In international perspective, the American working class appears docile and complacent. It has never supported a strong socialist movement; a weak union movement has limited itself to simple wage demands; and class conflict here has rarely threatened to explode into a social revolution. Both radicals and mainstream scholars have explained this American exceptionalism by the conservative psychology of the American worker. This provocative book presents a new vision of the American working class. *The American Perception of Class* offers a radically new interpretation of American class conflict and criticizes earlier analyses for psychologizing the problem and

blaming the victims for their subordination. It marshals a great variety of evidence, primarily from national surveys, to demonstrate that, contrary to what almost everybody has assumed, American workers are indeed class conscious. They have not been so beguiled by images of a classless society that they can no longer recognize the divide that separates them from their middle class and corporate bosses; nor have they been swallowed up by an affluent middle class; and they have not been so divided by racial and ethnic loyalties, or gender specific interests that they have forgotten their common class position. Finally, the book suggests a new approach to class conflict in America—one not based on the psychology of the American worker but on the strength of American business and its capacity to overwhelm or redirect any challenge from below. No other working class has faced such a formidable opponent. Author note: Reeve Vanneman is Associate Professor of Sociology at the University of Maryland at College Park. >P>Lynn Weber Cannon is Associate Director for the Center for Research on Women and Professor of Sociology at Memphis State University.
