Global Economic History: A Very Short Introduction Robert C. Allen, 2011-09-15 Why are some countries rich and others poor? In 1500, the income differences were small, but they have grown dramatically since Columbus reached America. Since then, the interplay between geography, globalization, technological change, and economic policy has determined the wealth and poverty of nations. The industrial revolution was Britain's path breaking response to the challenge of globalization. Western Europe and North America joined Britain to form a club of rich nations by pursuing four policies-creating a national market by abolishing internal tariffs and investing in transportation, erecting an external tariff to protect their fledgling industries from British competition, banks to stabilize the currency and mobilize domestic savings for investment, and mass education to prepare people for industrial work. Together these countries pioneered new technologies that have made them ever richer. Before the Industrial Revolution, most of the world's manufacturing was done in Asia, but industries from Casablanca to Canton were destroyed by western competition in the nineteenth century, and Asia was transformed into 'underdeveloped countries' specializing in agriculture. The spread of economic development has been slow since modern technology was invented to fit the needs of rich countries and is ill adapted to the economic and geographical conditions of poor countries. A few countries - Japan, Soviet Russia, South Korea, Taiwan, and perhaps China - have, nonetheless, caught up with the West through creative responses to the technological challenge and with Big Push industrialization that has achieved rapid growth through investment coordination. Whether other countries can emulate the success of East Asia is a challenge for the future. An Economic History of Europe Antonio Di Vittorio, 2006-09-27 An Economic History of Europe provides students with a comprehensive introduction to European economic history from the fifteenth century to the present day. Individual chapters offer brief references to previous historical periods and events, with special attention given to core themes concerning economic development, and an analysis of their change through time and space. Core themes examined in each period include: the increasing prominence of industry international trade demand and supply dynamics agriculture. The unique structure of this text enables students not only to gain a firm grounding in the long-term evolution of the European economy, but also provides an historical overview of the economic development of individual countries. Individual contributors analyze the shift from the modern to the contemporary period and offer a broad explanation of the historical roots of the problems that face today's economic development. This key text is indispensable reading for students in economics, economic history, development economics and history.

L'economia europea 1750-1914. Un approccio tematico Derek Howard Aldcroft, 2003

Between Two Cultures Carlo M. Cipolla, 1992 In this wise and witty work, a world-renowned economic historian takes us behind the scenes to observe a small band of scholars reconstructing the past with the tools of economic analysis and the narrative power of the traditional historian.

RETI MARITTIME COME FATTORI DELL'INTEGRAZIONE EUROPEA MARITIME NETWORKS AS A FACTOR IN EUROPEAN INTEGRATION Giampiero Nigro, 2019 An analysis of Valencia's fifteenth-century port activity functional to the study of the city's diverse maritime networks and markets based on first-hand archive research mainly focusing on the second half of the fifteenth century. The text also takes into account an assortment of further late-fourteenth to early-sixteenth century data collected and analysed by other authors.

The British Industrial Revolution in Global Perspective Robert C. Allen, 2009-04-09 Why did the industrial revolution take place in 18th century Britain and not elsewhere in Europe or Asia? Robert Allen argues that the British industrial revolution was a successful response to the global economy of the 17th and 18th centuries.

History of Economic Thought Harry Landreth, David C. Colander, 2002 An upper-level text, History of Economic Thought continues to offer a lively, accessible discussion of ideas that have shaped modern economics. The Fourth Edition

has been thoroughly revised to reflect recent scholarship and research, as well as a more pointed focus on modern economic thought. The text remains a highly understandable and opinionated--but fair--presentation of the history of economic thought.

Industrialization in Nineteenth Century Europe Tom Kemp, 2014-06-06 Written for the layman as well as the economic historian this famous and much-used book not only presents a general synthesis of the pattern of European industrialisation; it also provides material for a comparative study by illustrating, in separate case studies, the specific characteristics of development in Britain, France, Germany, Russia and Italy.

Profitti del potere Silvia A. Conca Messina, 2016-02-18 T00:00:00+01:00 Tra il 1500 e il 1800 l'Europa fu interessata da una profonda trasformazione economica: la popolazione crebbe di circa due volte e mezzo, la struttura occupazionale si modificò, gli scambi aumentarono in maniera costante avviando un processo di crescente integrazione tra i mercati a livello globale. L'espansione economica pose le basi per la rivoluzione industriale e per la supremazia economica europea fino al Novecento. Ma quali furono i fattori determinanti di tale trasformazione? Che ruolo ebbe lo Stato? L'intervento dello Stato nell'economia, le guerre e la finanza pubblica rappresentarono elementi chiave alla base del diverso grado di prosperità economica. Un'analisi che contribuisce a fornire una spiegazione più compiuta della 'grande divergenza' di sviluppo tra Oriente e Occidente.
