*Global Economic History: A Very Short Introduction* Robert C. Allen,2011-09-15 Why are some countries rich and others poor? In 1500, the income differences were small, but they have grown dramatically since Columbus reached America. Since then, the interplay between geography, globalization, technological change, and economic policy has determined the wealth and poverty of nations. The industrial revolution was Britain's path breaking response to the challenge of globalization. Western Europe and North America joined Britain to form a club of rich nations by pursuing four polices-creating a national market by abolishing internal tariffs and investing in transportation, erecting an external tariff to protect their fledgling industries from British competition, banks to stabilize the currency and mobilize domestic savings for investment, and mass education to prepare people for industrial work. Together these countries pioneered new technologies that have made them ever richer. Before the Industrial Revolution, most of the world's manufacturing was done in Asia, but industries from Casablanca to Canton were destroyed by western competition in the nineteenth century, and Asia was transformed into 'underdeveloped countries' specializing in agriculture. The spread of economic development has been slow since modern technology was invented to fit the needs of rich countries and is ill adapted to the economic and geographical conditions of poor countries. A few countries - Japan, Soviet Russia, South Korea, Taiwan, and perhaps China - have, nonetheless, caught up with the West through creative responses to the technological challenge and with Big Push industrialization that has achieved rapid growth through investment coordination. Whether other countries can emulate the success of East Asia is a challenge for the future. RETI MARITTIME COME FATTORI DELL'INTEGRAZIONE EUROPEA MARITIME NETWORKS AS A FACTOR IN EUROPEAN INTEGRATION Giampiero Nigro,2019 An analysis of Valencia's fifteenth-century port activity functional to the study of the city's diverse maritime networks and markets based on first-hand archive research mainly focusing on the second half of the fifteenth century. The text also takes into account an assortment of further late-fourteenth to early-sixteenth century data collected and analysed by other authors.

*The British Industrial Revolution in Global Perspective* Robert C. Allen,2009-04-09 Why did the industrial revolution take place in 18th century Britain and not elsewhere in Europe or Asia? Robert Allen argues that the British industrial revolution was a successful response to the global economy of the 17th and 18th centuries.

*History of Economic Thought* Harry Landreth,David C. Colander,2002 An upper-level text, History of Economic Thought continues to offer a lively, accessible discussion of ideas that have shaped modern economics. The Fourth Edition has been

thoroughly revised to reflect recent scholarship and research, as well as a more pointed focus on modern economic thought. The text remains a highly understandable and opinionated--but fair--presentation of the history of economic thought.

Industrialization in Nineteenth Century Europe Tom Kemp,2014-06-06 Written for the layman as well as the economic historian this famous and much-used book not only presents a general synthesis of the pattern of European industrialisation; it also provides material for a comparative study by illustrating, in separate case studies, the specific characteristics of development in Britain, France, Germany, Russia and Italy.

**Profitti del potere** Silvia A. Conca Messina,2016-02-18T00:00:00+01:00 Tra il 1500 e il 1800 l'Europa fu interessata da una profonda trasformazione economica: la popolazione crebbe di circa due volte e mezzo, la struttura occupazionale si modificò, gli scambi aumentarono in maniera costante avviando un processo di crescente integrazione tra i mercati a livello globale. L'espansione economica pose le basi per la rivoluzione industriale e per la supremazia economica europea fino al Novecento. Ma quali furono i fattori determinanti di tale trasformazione? Che ruolo ebbe lo Stato? L'intervento dello Stato nell'economia, le guerre e la finanza pubblica rappresentarono elementi chiave alla base del diverso grado di prosperità economica. Un'analisi che contribuisce a fornire una spiegazione più compiuta della 'grande divergenza' di sviluppo tra Oriente e Occidente.
