The Discovery of Tutankhamun's Tomb (Illustrated Edition) Howard Carter, Arthur Cruttenden Mace, 2019-12-18 Through this fascinating story we experience the adventure, the painstaking work, the magic, the excitement and the awe through the eyes of the tomb raider himself, archaeologist Howard Carter. This book tells the story of one of the greatest archaeological discoveries ever, the discovery of the intact tomb of the 18th Dynasty Pharaoh, Tutankhamun (colloquially known as King Tut and the boy king), in November 1922.

The Discovery of the Tomb of Tutankhamun Howard Carter, A. C. Mace, 2012-10-19 This book captures the painstaking, step-by-step process of excavation, and the wonders of the treasure-filled inner chamber. 106 on-the-spot photographs depict the phases of the discovery and the scrupulous cataloging of the treasures.

Tutankhamun's Tomb Susan J. Allen, 2006 This richly illustrated book of vintage photographs commemorates one of the most memorable episodes in the history of archaeology: the discovery and exploration in 1922 of the tomb of the ancient Egyptian pharaoh Tutankhamun (Dynasty 18, ruled ca. 1336-1327 B.C.). These photographs, documenting every stage in the process of discovery, were taken by the renowned archaeological photographer Harry Burton. Burton was a staff member of the Metropolitan Museum Egyptian Expedition when he was lent to Howard Carter, the famed excavator of Tutankhamun's tomb. From the rock-cut steps leading down to the entrance passage, to the opening of the sealed chambers inside, to the first view of the contents of the tomb and the removal of the objects, Burton's beautiful black-and-white photographs show thousands of the richly made and decorated objects found in the tomb. Carefully reproduced from Burton's original prints, the photographs are accompanied by new descriptive text written by two prominent Egyptologists with extensive knowledge of the history of Tutankhamun and the contents of his tomb.

Tutankhamun Richard Bruce Parkinson, 2022-04-15 In 1922, as Egypt became an independent nation, the tomb of the young king Tutankhamun was discovered at Luxor, the first known intact royal burial from ancient Egypt. The excavation of

the small but crowded tomb by Howard Carter and his team generated enormous media interest and was famously photographed by Harry Burton. These photographs, along with letters, plans, drawings and diaries, are part of an archive created by the excavators and presented to the Griffith Institute, University of Oxford after Carter's death. These historic images and records present a vivid and first-hand account of the discovery, of the spectacular variety of the king's burial goods and of the remarkable work that went into documenting and conserving them. The archive enables a nuanced and inclusive view of the complexities of both the ancient burial and the excavation, including often overlooked Egyptian members of the archaeological team. This selection of fifty key items by the staff of the Griffith Institute provides an accessible and authoritative overview of the archive, drawing on new research on the collection and giving an intimate insight into the records of one of the world's most famous archaeological discoveries.

The Tomb of Tutankhamun: Volume 2 Howard Carter, 2014-10-23 The discovery of the resting place of the great Egyptian Pharaoh Tutankhamun [Tut.ankh.Amen] in November 1922 by Howard Carter and the fifth Earl of Carnarvon was the greatest archaeological find the world had ever seen. Despite its plundering by thieves in antiquity, the burial of the king lay intact with its nest of coffins and funerary shrines, surrounded by a mass of burial equipment arranged in three peripheral chambers. Following on from the first volume's account of the search for and initial discovery of the team, in the second volume Howard Carter recounts the discovery of the king's burial chamber: the breakthrough to the four protective shrines, the revelation of the quartz-sandstone sarcophagus, the king's three coffins (his own of pure gold) and the bejewelled mummy of the Pharaoh himself. Now available in the Bloomsbury Revelations series, the book includes over 150 photographs of the treasures that lay within the great burial chamber of Tutankhamun.

The Tomb of Tutankhamun: Volume 1 Howard Carter, 2014-10-23 The discovery of the resting place of the great Egyptian King Tutankhamun [Tut.ankh.Amen] in November 1922 by Howard Carter and the fifth Earl of Carnarvon was the greatest archaeological find the world had ever seen. Despite its plundering by thieves in antiquity, the burial of the king lay intact with its nest of coffins and funerary shrines, surrounded by a mass of burial equipment arranged in three peripheral chambers. Published in 1923, this is the first volume of Carter's trilogy, describing the years of frustration in search of the burial site, the triumph of its eventual discovery and the long, painstaking process of exploring and cataloguing its treasures. Containing over 100 images from the site itself, this volume also includes Carter's short article, 'The Tomb of the Bird,' which inadvertently spawned the legend of the great curse of Tutankhamun's tomb.

Howard Carter and the Discovery of the Tomb of Tutankhamun H. V. F. Winstone, 2007-02-01 This book presents the incredible story of the discovery of those 'wonderful things', and the splendour of the most memorial of all royal legends. Told with style and distinction, it includes previously unseen watercolours by Carter; the story of the relationship between Carter and his patrol, 5th Earl of Carnarvon and his daughter Lady Evelyn; new Foreword by Henrietta McCall of the British

Museum; new Appendix devoted to the remarkable Almina Countess of Carnarvon, illegitimate daughter of Baron Alfred Rothschild, whose wedding dowry largely financed the search for the tomb and its excavation.

Discovering Tutankhamun Zahi Hawass, 2013 Penned by a scholar who was personally involved in research into the enigmatic young pharaoh, this fully illustrated study reviews our knowledge about the life, death, and burial of Tutankhamun. Zahi Hawass places the king in the broader context of Egyptian history, unravelling the intricate and much debated relationship between various members of the royal family, and the circumstances surrounding the turbulent Amarna period.

Egyptomania Bob Brier, 2013-11-12 “A delightful romp through key formative events that shaped our popular passion for all things ancient Egyptian.” —Peter Der Manuelian, Professor of Egyptology, Harvard University When the Romans conquered Egypt, it was really Egypt that conquered the Romans. Cleopatra captivated both Caesar and Marc Antony and soon Roman ladies were worshipping Isis and wearing vials of Nile water around their necks. In this book, renowned Egyptologist Bob Brier explores our three-thousand-year-old fascination with all things Egyptian—from ancient times to Napoleon’s Egypt Campaign, the discovery of Tutankhamen’s tomb, and beyond. In this original and groundbreaking book, Brier traces our fascination with mummies that seem to have cheated death and the iconic pyramids that have stood strong for millennia. He also includes twenty-four pages of color photos from his impressive collection of Egyptian memorabilia, which includes everything from Napoleon’s twenty volume Egypt encyclopedia to archeologist Howard Carter’s letters written as he was excavating the Valley of the Kings.

Photographing Tutankhamun Christina Riggs, 2020-09-19 They are among the most famous and compelling photographs ever made in archaeology: Howard Carter kneeling before the burial shrines of Tutankhamun; life-size statues of the boy king on guard beside a doorway, tantalizingly sealed, in his tomb; or a solid gold coffin still draped with flowers cut more than 3,300 years ago. Yet until now, no study has explored the ways in which photography helped mythologize the tomb of Tutankhamun, nor the role photography played in shaping archaeological methods and interpretations, both in and beyond the field. This book undertakes the first critical analysis of the photographic archive formed during the ten-year clearance of the tomb, and in doing so explores the interface between photography and archaeology at a pivotal time for both. Photographing Tutankhamun foregrounds photography as a material, technical, and social process in early 20th-century archaeology, in order to question how the photograph made and remade ‘ancient Egypt’ in the waning age of colonial order.

Treasured Christina Riggs, 2021-11-04 'Impeccably researched and beautifully written' David Wengrow 'Utterly original' Paul Strathern When it was found in 1922, the 3,300-year old tomb of Tutankhamun sent shockwaves around the world, turning the boy-king into a household name overnight and kickstarting an international media obsession that endures to this day. From pop culture and politics to tourism and heritage, and from the Jazz Age to the climate crisis, it's impossible to imagine the twentieth century without the discovery of Tutankhamun - yet so much of the story remains untold. Here, for the

first time, Christina Riggs weaves compelling historical analysis with tales of lives touched by an encounter with Tutankhamun, including her own. Treasured offers a bold new history of the young pharaoh who has as much to tell us about our world as his own. 'Searching, masterful and eloquent' James Delbourgo

Searching for the Lost Tombs of Egypt Chris Naunton, 2019-12-19 Where are the tombs of Alexander the Great or Cleopatra? Both rulers were buried in Egypt, but their tombs have never been found despite years of intensive research and excavation. Yet we have tantalizing clues. Searching for the Lost Tombs of Egypt describes the quest for these and other great missing tombs those we know existed, but which have not yet been identified. It also discusses key moments of discovery that have yielded astonishing finds and created the archetypal image of the archaeologist poised at the threshold of a tomb left untouched for millennia. In this gripping account, Chris Naunton explains the mysteries of the missing tombs and presents all the evidence, skilfully unravelling the tangled threads surrounding the burials of the heretic pharaoh Akhenaten and his son Tutankhamun, and the burial place of Imhotep, architect of the Step Pyramid at Saqqara, among others. Could other such tombs lie undiscovered in the Valley of the Kings? In fact, the Valley almost certainly does guard hidden treasures. Amazing finds of unsuspected tombs continue to occur there and elsewhere in Egypt, making headlines worldwide all are covered in this book. As well as immersing the reader, step by step, in the action of the search and the thrill of discovery, the book also explores the reasons why tombs remain such a central part of both the popular perception of Egyptology and the continuing allure of ancient Egypt. Howard Carter Thomas Garnet Henry James, 1992 The general understanding of the life and career of Howard Carter is dominated by his discovery in 1922 of the tomb of Tutankhamun. By this time he had already spent nearly thirty years in Egypt, much of it in archaeological activity other than excavation. This book places the great discovery in the context of Carter's whole career, describing the clearly defined stages by which a young man of 17, brought to Egypt as a 'tracer' and knowing little beyond how to use a pencil and an artist's brush, became what one great Egyptologist called 'the very best artist', was appointed at the age of 26 the first Chief Inspector of Antiquities in Upper Egypt, and by good fortune out of disaster became 'the learned man' who assisted the 5th Earl of Carnarvon in his Theban excavations. Howard Carter's career before Tutankhamun was by no means confined to grubbing in unimportant sites. He was fortunate to be working in Egypt in the years when excavation and other forms of field-work, especially epigraphy, were developing beyond the amateurism and informal buccaneering of earlier times. His natural talents as artist, observer, and practical man, with his rare sympathy and understanding of the Egyptians who lived and worked in the prime excavation sites, made him well suited to the uncertain conditions and unpredictable results of archaeological activities. Of modest origin, and by nature a solitary man, he was drawn to the grand life of those who made Egyptology a rich man's pastime in the early years of the twentieth century; of irascible and stubborn temper, he often alienated his supporters, and threatened his own downfall. He was not an easy man

to be involved with. In this study of a complex character, who ultimately achieved supreme archaeological triumph, much use has been made of a wide range of documentary sources, including some never previously exploited, so as to place Howard Carter in the social and political milieu of Egypt at a period of great change.

Lord and Pharaoh Brian Fagan, 2015-03-15 Though they lived over 3000 years apart, the lives of Egyptian King Tutankhamun and the fifth Lord Carnarvon-- who found his tomb-- share many parallels. Brian Fagan's artful narrative weaves these two lives together, showing how archaeological information can effectively tell the story of real lives of people in the past.

ArtCurious Jennifer Dasal, 2020-09-15 A wildly entertaining and surprisingly educational dive into art history as you've never seen it before, from the host of the beloved ArtCurious podcast We're all familiar with the works of Claude Monet, thanks in no small part to the ubiquitous reproductions of his water lilies on umbrellas, handbags, scarves, and dorm-room posters. But did you also know that Monet and his cohort were trailblazing rebels whose works were originally deemed unbelievably ugly and vulgar? And while you probably know the tale of Vincent van Gogh's suicide, you may not be aware that there's pretty compelling evidence that the artist didn't die by his own hand but was accidentally killed--or even murdered. Or how about the fact that one of Andy Warhol's most enduring legacies involves Caroline Kennedy's moldy birthday cake and a collection of toenail clippings? ArtCurious is a colorful look at the world of art history, revealing some of the strangest, funniest, and most fascinating stories behind the world's great artists and masterpieces. Through these and other incredible, weird, and wonderful tales, ArtCurious presents an engaging look at why art history is, and continues to be, a riveting and relevant world to explore.

The Red Sea Scrolls Pierre Tallet, Mark Lehner, 2022-02-03 Pierre Tallet's discovery of the Red Sea Scrolls the world's oldest surviving written documents in 2013 was one of the most remarkable moments in the history of Egyptology. These papyri, written some 4,600 years ago, combined with Mark Lehnner's research and theories, change what we thought we knew about the building of the Great Pyramid at Giza. Here, for the first time, Tallet and Lehner together give us the definitive account of this astounding discovery. The story begins with Tallet's hunt for hieroglyphic rock inscriptions in the Sinai Peninsula, leading up to the discovery of the papyri the diary of Inspector Merer, who oversaw workers in the reign of Pharaoh Khufu in Wadi el-Jarf, the site of an ancient harbour on the Red Sea. The translation of the papyri reveals for the first time exactly how the stones of the Great Pyramid were transported to Giza. Combined with Lehner's excavations of the recently unearthed harbour, the Red Sea Papyri have greatly advanced our understanding of how the ancient Egyptians were able to build monuments that survive to this day. Tallet and Lehner narrate this thrilling discovery and explore how the building of the pyramids helped create a unified state, propelling Egyptian civilization forward. This lavishly illustrated book captures the excitement and significance of these seminal findings, conveying above all how astonishing it is to discover a

contemporary eye-witness testimony to the creation of the only remaining Wonder of the Ancient World.

A World Beneath the Sands Toby Wilkinson, 2020-10-15 'It is a story full of drama, with the Nile, the pyramids and the Valley of the Kings as backdrop. That A World Beneath the Sands is also a subtle and stimulating study of the paradoxes of 19th-century colonialism is a bonus indeed.' – Tom Holland, Guardian What could be more exciting, more exotic or more intrepid than digging in the sands of Egypt in the hope of discovering golden treasures from the age of the pharaohs? Our fascination with ancient Egypt goes back to the ancient Greeks. But the heyday of Egyptology was undoubtedly the nineteenth and early twentieth centuries. This golden age of scholarship and adventure is neatly book-ended by two epoch-making events: Champollion's decipherment of hieroglyphics in 1822 and the discovery of Tutankhamun's tomb by Howard Carter and Lord Carnarvon a hundred years later. In A World Beneath the Sands, the acclaimed Egyptologist Toby Wilkinson tells the riveting stories of the men and women whose obsession with Egypt's ancient civilisation drove them to uncover its secrets. Champollion, Carter and Carnarvon are here, but so too are their lesser-known contemporaries, such as the Prussian scholar Karl Richard Lepsius, the Frenchman Auguste Mariette and the British aristocrat Lucie Duff-Gordon. Their work – and those of others like them – helped to enrich and transform our understanding of the Nile Valley and its people, and left a lasting impression on Egypt, too. Travellers and treasure-hunters, ethnographers and epigraphers, antiquarians and archaeologists: whatever their motives, whatever their methods, all understood that in pursuing Egyptology they were part of a greater endeavour – to reveal a lost world, buried for centuries beneath the sands.
