**Sherwin B. Nuland**

**Fads and Fallacies in the Name of Science** Martin Gardner,2012-05-04 Fair, witty appraisal of cranks, quacks, and quackeries of science and pseudoscience: hollow earth, Velikovsky, orgone energy, Dianetics, flying saucers, Bridey Murphy, food and medical fads, and much more.

**Doctors** Sherwin B. Nuland,2011-10-19 From the author of *How We Die*, the extraordinary story of the development of modern medicine, told through the lives of the physician-scientists who paved the way. How does medical science advance? Popular historians would have us believe that a few heroic individuals, possessing superhuman talents, lead an unselfish quest to better the human condition. But as renowned Yale surgeon and medical historian Sherwin B. Nuland shows in this brilliant collection of linked life portraits, the theory bears little resemblance to the truth. Through the centuries, the men and women who have shaped the world of medicine have been not only very human, but also very much the products of their own times and places. Presenting compelling studies of great medical innovators and pioneers, *Doctors* gives us a fascinating history of modern medicine. Ranging from the legendary Father of Medicine, Hippocrates, to Andreas Vesalius, whose Renaissance masterwork on anatomy offered invaluable new insight into the human body, to Helen Taussig, founder of pediatric cardiology and co-inventor of the original blue baby operation, here is a volume filled with the spirit of ideas and the thrill of discovery.

**Psychiatry** Thomas Szasz,2019-02-28 For more than half a century, Thomas Szasz has devoted much of his career to a radical critique of psychiatry. His latest work, *Psychiatry: The Science of Lies*, is a culmination of his life's work: to portray the integral role of deception in the history and practice of psychiatry. Szasz argues that the diagnosis and treatment of mental illness stands in the same relationship to the diagnosis and treatment of bodily illness that the forgery of a painting does to the original masterpiece. Art historians and the legal system seek to distinguish forgeries from originals. Those concerned with medicine, on the other hand—physicians, patients, politicians, health insurance providers, and legal professionals—take the opposite stance when faced with the challenge of distinguishing everyday problems in living from bodily diseases, systematically authenticating nondiseases as diseases. The boundary between disease and

nondisease—genuine and imitation, truth and falsehood—thus becomes arbitrary and uncertain. There is neither glory nor profit in correctly demarcating what counts as medical illness and medical healing from what does not. Individuals and families wishing to protect themselves from medically and politically authenticated charlatanry are left to their own intellectual and moral resources to make critical decisions about human dilemmas miscategorized as mental diseases and about medicalized responses misidentified as psychiatric treatments. Delivering his sophisticated analysis in lucid prose and with a sharp wit, Szasz continues to engage and challenge readers of all backgrounds.

Stefan Zweig Randolph J. Klawiter, 2020-05 Originally published in 1965, this volume presented the only comprehensive bibliography of the writings of the Austrian novelist, journalist, and playwright Stefan Zweig and of the books and articles about his work.

The Fairy-faith in Celtic Countries Walter Yeeling Evans-Wentz, 1911 In this study, which is first of all a folk-lore study, we pursue principally an anthropo-psychological method of interpreting the Celtic belief in fairies, though we do not hesitate now and then to call in the aid of philology; and we make good use of the evidence offered by mythologies, religions, metaphysics, and physical sciences.

**Haunted Media** Jeffrey Sconce, 2000 Examines the repeated association of new electronic media with spiritual phenomena from the telegraph in the late 19th century to television.

*Sigmund Freud and the History of Anna O.* R. Skues, 2006-08-30 In recent years historians of psychoanalysis have come to view Freud's case of Anna O. as a failure and have cast doubt on the very foundations of psychoanalysis itself. This new study challenges existing historical scholarship by providing an unparalleled review of the available evidence on the case and reaches new conclusions about its outcome.

*Hysteria Beyond Freud* Sander L. Gilman, Helen King, Roy Porter, G. S. Rousseau, Elaine Showalter, 2024-03-29 She's hysterical. For centuries, the term hysteria has been used by physicians and laymen to diagnose and dismiss the extreme emotionality and mysterious physical disorders presumed to bedevil others—especially women. How did this medical concept assume its power? What cultural purposes does it serve? Why do different centuries and different circumstances produce different kinds of hysteria? These are among the questions pursued in this absorbing, erudite reevaluation of the history of hysteria. The widely respected authors draw upon the insights of social and cultural history, rather than Freudian psychoanalysis, to examine the ways in which hysteria has been conceived by doctors and patients, writers and artists, in Europe and North America, from antiquity to the early years of the twentieth century. In so doing, they show that a history of hysteria is a history of how we understand the mind. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship

accessible once again using print-on-demand technology. This title was originally published in 1993.

**The Nature Fix: Why Nature Makes Us Happier, Healthier, and More Creative** Florence Williams, 2017-02-07 Highly informative and remarkably entertaining. —Elle From forest trails in Korea, to islands in Finland, to eucalyptus groves in California, Florence Williams investigates the science behind nature's positive effects on the brain. Delving into brand-new research, she uncovers the powers of the natural world to improve health, promote reflection and innovation, and strengthen our relationships. As our modern lives shift dramatically indoors, these ideas—and the answers they yield—are more urgent than ever.

Healing Without Medicine Albert Amao, Mitch Horowitz, 2014 As a man thinketh, so is he? thus is the biblical King Solomon often quoted by proponents of New Thought, one of the most influential native religious movements in America. Albert Amao provides an engaging and serious history of this and related movements from the eighteenth century to the present. His discussion ranges from Phineas P. Quimby, the father of New Thought, and Mary Baker Eddy, founder of Christian Science, to Myrtle Fillmore, cofounder of Unity Church of Christianity, William James, the father of American psychology, and leaders in the emerging field of Energy Psychology.

**Playing the Waves** Jan Simons, 2007 Dogma 95, the avant-garde filmmaking movement founded by the Danish director Lars von Trier and three of his fellow directors, was launched in 1995 at an elite cinema conference in Paris—when von Trier was called upon to speak about the future of film but instead showered the audience with pamphlets announcing the new movement and its manifesto. A refreshingly original critical commentary on the director and his practice, *Playing the Waves* is a paramount addition to one of new media's most provocative genres: games and gaming. *Playing the Waves* cleverly puns on the title of one of von Trier's most famous features and argues that Dogma 95, like much of the director's low-budget realist productions, is a game that takes cinema beyond the traditional confines of film aesthetics and dramatic rules. Simons articulates the ways in which von Trier redefines the practice of filmmaking as a rule-bound activity, and stipulates the forms and structures of games von Trier brings to bear on his films, as well as the sobering lessons he draws from economic and evolutionary game theory. Much like the director's films, this fascinating volume takes the traditional point of view of film theory and film aesthetics to the next level and demonstrates we have much to learn from the perspective of game studies and game theory.

Mind Myths Sergio Della Sala, 1999-06-02 *Mind Myths* shows that science can be entertaining and creative. Addressing various topics, this book counterbalances information derived from the media with a 'scientific view'. It contains contributions from experts around the world.

**The Cure Within: A History of Mind-Body Medicine** Anne Harrington, 2009-02-16 A splendid history of mind-body medicine...a book that desperately needed to be written. —Jerome Groopman, *New York Times* Is stress a deadly disease on

the rise in modern society? Can mind-body practices from the East help us become well? When it comes to healing, we believe we must look beyond doctors and drugs; we must look within ourselves. Faith, relationships, and attitude matter. But why do we believe such things? From psychoanalysis to the placebo effect to meditation, this vibrant cultural history describes mind-body healing as rooted in a patchwork of stories, allowing us to make new sense of our suffering and to rationalize new treatments and lifestyles.

*New Curriculum History*, 2019-02-11 Rereading the historical record indicates that it is no longer so easy to argue that history is simply prior to its forms. Since the mid-1990s a new wave of research has formed around wider debates in the humanities and social sciences, such as decentering the subject, new analytics of power, reconsideration of one-dimensional time and three-dimensional space, attention to beyond-archival sources, alterity, Otherness, the invisible, and more. In addition, broader and contradictory impulses around the question of the nation - transnational, post-national, proto-national, and neo-national movements—have unearthed a new series of problematics and focused scholarly attention on traveling discourses, national imaginaries, and less formal processes of socialization, bonding, and subjectification. *New Curriculum History* challenges prior occlusions in the field, building upon and departing from previous waves of scholarship, extending the focus beyond the insularity of public schooling, the traditional framework of the self-contained nation-state, and the psychology of the schooled individual. Drawing on global studies, historical sociology, postcolonial studies, critical race theory, visual culture theory, disability studies, psychoanalytics, Cambridge school structuralisms, poststructuralisms, and infra- and transnational approaches the volume holds together not despite but because of differences and incommensurabilities in rereading historical records.

**Mental Healers: Franz Anton Mesmer, Mary Baker Eddy, Sigmund Freud** Stefan Zweig, 2019-08-16 This Plunkett Lake Press eBook is produced by arrangement with Viking, an imprint of Penguin Publishing Group, a division of Penguin Random House LLC. "Health is natural; sickness is unnatural: at least so it seems to man," is how Stefan Zweig begins his fascinating, often entertaining examinations of Franz Anton Mesmer, Mary Baker Eddy, and Sigmund Freud. "Bodily suffering is not assuaged by technical manipulation but through an act of faith." *Mental Healers* is dedicated to Albert Einstein, the scientist who had won the Nobel Prize for Physics in 1921. It first appeared in 1931 as *Die Heilung durch den*

Geist, or Healing Through the Spirit, a title that anticipates our current interest in alternative medicine and the placebo effect. Zweig's first healer, Franz Anton Mesmer (1734-1815), was a German physician who introduced "animal magnetism" to the world. Viewed by many as a charlatan, he died an outcast before he could properly understand and explain his discovery. Zweig's second healer, Mary Baker Eddy (1821-1910), was a New England matron who found her vocation only in middle age. She established Christian Science, an American Protestant system of religious practice that rejects medical intervention, when she was almost 60. Zweig's third healer, Sigmund Freud (1856-1939), was the Viennese Jewish physician who founded psychoanalysis. Zweig, who knew Freud and delivered a eulogy at his funeral, describes Freud's then-new ideas with the insight of an artist who lived in the same time and place. Fluently written and psychologically astute, *Mental Healers* is compelling cultural history and a valuable window onto the genesis of new ideas in healing. "Mesmer, Eddy and Freud were critical figures alerting the modern world to the influences of the mental and emotional on health and illness. Their impact was tremendous and Zweig's classic study provides a wonderful opportunity to engage with these significant innovators." — Ted Kaptchuk, Professor of Medicine, Harvard Medical School, Director, Program in Placebo Studies & Therapeutic Encounter

**Immoral Memories** Sergei Eisenstein, 2014 Sergei Eisenstein (1898-1948), creator of such masterpieces as *Battleship Potemkin*, *Alexander Nevsky* and *Ivan the Terrible*, was perhaps the greatest of all film directors. He wrote his autobiography in 1946, two years before his death, and it is a work of major importance in the light it sheds on his personality and mercurial genius. Vivid, eccentric and free-ranging, *Immoral Memories* is written in a style reminiscent of the brilliant visual effects of montage and dynamic progression that characterize its author's film-making technique. He recounts his life in Russia from the time of the Revolution, during which he served in the Bolshevik army as a volunteer, his travels in the West and his encounters with a remarkable medley of individuals during his long career. He gives us unique insights, too, into his triumphs and tribulations. His disappointments and despair were exemplified by the banning of the film *Ivan the Terrible, Part II*, which was not released until fifteen years after his death. And he never expected his autobiography to be published in Russia. Yet in answer to his query *Has there been life* he replied that there had been life lived acutely, joyously, tormentedly, at times even sparkling, unquestionably colourful, and such a life that, I suppose, I would not exchange for another-- Publisher's description.
