Active Hope Joanna Macy ,Chris Johnstone,2022-06-14 The challenges we face can be difficult even to think about. Climate change, war, political polarization, economic upheaval, and the dying back of nature together create a planetary emergency of overwhelming proportions. This revised, tenth anniversary edition of Active Hope shows us how to strengthen our capacity to face these crises so that we can respond with unexpected resilience and creative power. Drawing on decades of teaching an empowerment approach known as the Work That Reconnects, the authors guide us through a transformational process informed by mythic journeys, modern psychology, spirituality, and holistic science. This process equips us with tools to face the mess we're in and play our role in the collective transition, or Great Turning, to a life-sustaining society.

Light in a Dark House Jan Costin Wagner,2013-07-18 Finnish detective Kimmo Joentaa is called to the local hospital in which his young wife died several years before. An unidentified woman in a coma has been murdered by someone who wept over the body, their tears staining the sheets around her. The death marks the start of a series of killings, with the unknown

patient at their centre. As autumn turns to winter, and Christmas fast approaches, Kimmo's attempts to unravel the case and identify the first victim are complicated by the disappearance of his sometime girlfriend, who has vanished after a party thrown by the head of the police force, and by a colleague's spiral into the depths of a gambling addiction.

Value Based and Intelligent Asset Management Adolfo Crespo Márquez, Marco Macchi, Ajith Kumar Parlikad, 2019-06-29 The fundamental motivation of this book is to contribute to the future advancement of Asset Management in the context of industrial plants and infrastructures. The book aims to foster a future perspective that takes advantage of value-based and intelligent asset management in order to make a step forward with respect to the evolution observed nowadays. Indeed, the current understanding of asset management is primarily supported by well-known standards. Nonetheless, asset management is still a young discipline and the knowledge developed by industry and academia is not set in stone yet. Furthermore, current trends in new organizational concepts and technologies lead to an evolutionary path in the field. Therefore, this book aims to discuss this evolutionary path, starting first of all from the consolidated theory, then moving forward to discuss:

- The strategic understanding of value-based asset management in a company;
- An operational definition of value, as a concept on the background of value-based asset management;
- The identification of intelligent asset management, with the aim to frame a set of "tools" recommended to support the asset-related decision-making process over the asset lifecycle;
- The emergence of new technologies such as cyber physical systems and digital twins, and the implications of this on asset management.

Confessions of an Eco-Sinner Fred Pearce, 2008-10-01 A 2008 Indie Next Pick In *Confessions of an Eco-Sinner*, Fred Pearce surveys his home and then sets out to track down the people behind the production and distribution of everything in his daily life, from his socks to his computer to the food in his fridge. It's a fascinating portrait, by turns sobering and hopeful, of the effects the world's more than six billion inhabitants have on our planet—and of the working and living conditions of the people who produce most of these goods.

Microclimate for Cultural Heritage Dario Camuffo, 2019-06-25 *Microclimate for Cultural Heritage: Measurement, Risk Assessment, Conservation, Restoration, and Maintenance of Indoor and Outdoor Monuments, Third Edition*, presents the latest on microclimates, environmental issues and the conservation of cultural heritage. It is a useful treatise on microphysics, acting as a practical handbook for conservators and specialists in physics, chemistry, architecture, engineering, geology and biology who focus on environmental issues and the conservation of works of art. It fills a gap

between the application of atmospheric sciences, like the thermodynamic processes of clouds and dynamics of planetary boundary layer, and their application to a monument surface or a room within a museum. Sections covers applied theory, environmental issues and conservation, practical utilization, along with suggestions, examples, common issues and errors. - Connects theory to practice with clear illustrations, useful examples, and case studies - Covers practical issues, e.g. rising damp, moulds, and pests, indoor heating, thermal comfort, green lighting technology, performing field surveys - Presents the latest standards for measuring cultural assets and their environment - Discusses climate change and indoor - outdoor potential scenarios, including sea-level rise

Making Cities Resilient Vishwa Raj Sharma, Chandrakanta, 2019-02-08 As the world has transformed, so have cities. Today, cities are home to 54 percent of the world's population, and by the middle of this century that figure will likely rise to 66 percent. According to the United Nations (UN) Habitat I (1972), Habitat II (1996) and Habitat III (2016) summits, cities are facing many serious challenges, including growing inequality, security concerns and the worsening impacts of climate change. Uncontrolled urbanization has led to many problems (haphazard growth of areas, emergence of slums, inadequate water and power supply, poor sanitation, shortage of transport and other civic amenities, shrinking green spaces, pollution, crime, and urban disaster risks such as fire, flood, road and industrial accidents, etc.). Worldwide, communities at the international, national and local level are continuously working to improve human habitats. In order to make our planet more sustainable, the UN has moved from the Millennium Development Goals (MDG) to the Sustainable Development Goals (SDG). Among the latter, the aim of SDG 11 is to "...make cities and human settlements inclusive, safe, resilient and sustainable." In light of these challenges, various terms have emerged to help understand urban issues. Visualizing the problem, the United Nations program "Making Cities Resilient" is focused on mitigating the disaster risk in urban areas. This book analyzes terms such as: sustainable, resilient, livable, inclusive, smart and world class city, which have emerged in the process of combating urban challenges in today's world. The book addresses emerging concepts for cities, challenges and potentials, urban environments, health and planning/policies. Covering 14 large cities in India, as well as case studies from Japan, Singapore, Thailand, Malaysia, Poland and Sweden, it provides a regional dimension to and micro-level perspective on urban issues.

Development Projects Observed Albert O. Hirschman, 2014-12-10 Originally published in 1967, the modest and plainly descriptive title of Development Projects Observed is deceptive. Today, it is recognized as the ultimate volume of Hirschman's groundbreaking trilogy on development, and as the bridge to the broader social science themes of his subsequent writings. Though among his lesser-known works, this unassuming tome is one of his most influential. It is in this book that Hirschman first shared his now famous Principle of the Hiding Hand. In an April 2013 New Yorker issue, Malcolm Gladwell wrote an appreciation of the principle, described by Cass Sunstein in the book's new foreword as a bit of a trick up history's sleeve. It can be summed up as a phenomenon in which people's inability to foresee obstacles leads to actions that

succeed because people have far more problem-solving ability that they anticipate or appreciate. And it is in Development Projects Observed that Hirschman laid the foundation for the core of his most important work, Exit, Voice, and Loyalty, and later led to the concept of an exit strategy.
